

SRAM Card

Short Description:

SRAM Card | PCMCIA | Industrial Flash Storage | pako india

PRETEC PCMCIA SRAM Card conform to PCMCIA/JEIDA international standard and consist of multiple very low power consumption CMOS SRAM ICs, decoder IC and power control IC mounted on a very thin printed circuit board using surface mounting technology. With the dual back-up battery design, each SRAM card contains a replaceable but non-rechargeable 3V lithium battery and an on-board rechargeable but non-replaceable battery for data retention. There is also a battery case lock system to prevent battery dropping from the card.

Features:

SRAM Card | PCMCIA | Industrial Flash Storage | pako india

PCMCIA Type I

PCMCIA1.0/JEIDA4.0 (M86187)

Attribute Memory: 8K byte EE'PROM or no attribute memory

Dual back-up battery design and battery voltage detection function
